

Kontakt™ W

Simple and reliable
to increase efficiency

BIOTECH DENTAL

1

MORE THAN 35 YEARS OF EXPERTISE

Designed with scientific knowledge in implantology established for more than 35 years, and current manufacturing requirements, the Kontakt™ W implant increase technical performances with a high quality level.

Its purpose is to facilitate implantology access, both for practitioners and patients.

✓ **Narrowed, chamfered and micro-structured implant neck**

The narrowing neck reduces bone compression of the cortical bone. The micro-structured chamfer promotes the retention of blood coagulum which is necessary for bone reconstruction.

✓ **Platform switching**

Platform switching is an important factor concerning the tissue stability. The aim is to limit the occurrence of peri-implantitis.

✓ **Conical connection with hexagonal indexing**

Improved bacterial seal and eliminates micromovements between the implant and the abutment. The implant-abutment mechanical strength is enhanced. Placement of prosthetic parts becomes easier.

✓ **Performing implant surface with grade IV titanium (T60)**

The etched sandblasted surface improve wettability and osseointegration. The Kontakt™ W implant benefits from the same surface as the Kontakt™ S implant, which is certified CleanImplant.

✓ **Atraumatic spherical apex**

Thanks to its design, the apex protects the anatomical structure during surgery and allows a less invasive osteotomy.

2

TREATMENT SIMPLICITY AND FLEXIBILITY

A SINGLE CONNECTION
FOR THE WHOLE RANGE
OF KONTACT™ W IMPLANT

3 diameters and 5 different
lengths.

> **3 body diameters:**

> **5 lengths:**

6 mm / 8 mm / 10 mm / 12 mm / 14 mm

INCLUDE IMPLANT
SCANNING INTO YOUR
DIGITAL WORKFLOW

- ✓ Improve your digital workflow, your patients communication and accelerate the planning of your cases.
- ✓ Make your impressions easier with an intraoral scanner.

3

A SINGLE SURGICAL KIT FOR ALL KONTACT™ IMPLANTS

- ✓ **Compact** for optimal storage.
- ✓ **Understandable** thanks to colour markings for quick identification of instruments.
- ✓ **Practical** with fast and easy opening for instruments access.
- ✓ **Complete disassembly** for thorough cleaning and sterilisation.

4

A WIDE RANGE OF PROSTHETIC SOLUTIONS

- ✓ Cemented prosthesis
- ✓ Screw-retained prosthesis
- ✓ CAD-CAM prosthesis
